

MARFILPE

MOLEANOS OF PORTUGAL

MARFILPE

Member of the **CLUSTER Portugal OF MINERAL RESOURCES** since 2015.

Marfilpe, a company present in the Cluster Portugal Mineral Resources since 2015, is a reference portuguese company in the ornamental stones sector.

In addition to the domestic market, Marfilpe sells its goods and services to the most demanding customers in various international markets such as the United States of America, China, Europe, Arab countries, Russia, India, Brazil and Angola.

In order to ensure the business dynamism and its quality raw material in such diversified markets, Marfilpe has its own quarries in Portugal and Angola, from which various natural stones such as marble and granite are extracted. Using different partners, the company is also able to provide its customers with access to various ornamental stones such as onyxes, travertines, coloured stones, among several others.

Also, Marfilpe's work covers all areas of the production process: he extraction through its quarries, the transformation

of stones using the latest technology implemented in the factory and the verification of the stone's technical characteristics, as well as the decorative vision of the final product, for the work developed at the Atelier de Inovação & Desenvolvimento. Because great works are made in stone, Marfilpe's role is to value natural stone as a quality raw material, unique and unrepeatable. As a company, its journey has been made to extol the unique story that is told in the sediment of each stone and take that story to the four corners of the world.
