**FCUL**

member of the CLUSTER PORTUGAL  
MINERAL RESOURCES since 2016.

The **Faculty of Sciences of the University of Lisbon (FCUL)** was created under Decree-Law April 19, in 1911. Since its creation and until 1985, when it was transferred to its new facilities in Campo Grande, the **FCUL** worked in the building that used to hold the Polytechnic School, and before that, other key cultural and scientific institutes.

The mission of **FCUL** is to expand the limits of scientific and technological knowledge, transfer this knowledge into society and promote the innovation, as well as stimulate a research-based student education.

In Dec.2020, the undergraduate (57%), masters (35%), and doctoral (8%) students in **FCUL** were 5697, and the staff composed of 169 professors, 159 researchers, and 387 individuals in administration, laboratories, and other technical services. **FCUL** has a long and successful experience in **Mineral Resources** education, from basic to advanced training. Also noteworthy are the numerous research projects and the extensive list of innovative contributions on different topics related to **Mineral Resources**, involving national and international partners, from academy and industry.
