

António Galego & Filhos - Mármores S.A. was founded in the early 80's and started its activity in the transformation of Portuguese ornamental stones. Nowadays it counts with two own quarries being the main source of raw material for its factory that features the most modern technology for natural stone transformation producing from slabs, tiles, cut-to-size pieces among others. Our branches, located in Alcantarilha (Algarve) and Braga present our best portuguese marble as well as several types of national and international natural stone.
